

FulvX™

Fulvic acid 44.7% | Humic acid 41% | Potassium 12%

Soluble Fulvic Powder (from leonardite) with the **X factor** - a fully soluble humic acid powder that is uniquely compatible with everything.

KEY PERFORMANCE

- Zero compatibility issues
- Stabilises and magnifies all fertigation inputs
- Chelates and amplifies all foliars.
- Stimulates all soil life
- Increases drought resilience
- Counters abiotic stress

GROWTH STAGE

- ✓ Pre-planting
- ✓ Planting
- ✓ Vegetative Growth
- ✓ Pre-flower, Flowering, Fruit Set & Fill

SIZES:

25kg

PRODUCT CODE:

FULVX-25KG

TYPICAL ANALYSIS W/W (DRY BASIS):

Fulvic Acid	44.7%
Humic Acid	41%
Potassium (K)	12%
Sulphur (S)	0.3%
Calcium (Ca)	0.9%
Micronutrients	1.1%
Particle Size	Very fine powder

FulvX™

APPLICATION RATES

FERTIGATION:

500g – 2 kg per hectare

BROADACRE FOLIAR:

100–400g per 100L of water

ORCHARD FOLIAR:

500g– 1 kg per hectare

HORTICULTURE FOLIAR:

300g – 1 kg per hectare

SEED TREATMENT:

4 kgs per tonne of seed

LIQUID INJECT:

1 – 2 kg per hectare

STORAGE & HANDLING

Read safety directions before use.

The solution must be used promptly i.e. do not store.

This product is hydrophilic. In order to, preserve the product reseal the bag after using to avoid any moisture contact.

Do not pre-mix or store in diluted form.

Store in a dry area out of direct sunlight, not below 10°C as precipitation can occur.

*Disclaimer: Rates are dependent on biomass and water rates and should be used as a guide only. Application rates and frequencies should be adjusted according to crop monitoring and demand. Where higher water rates are required for good foliar coverage, do not exceed maximum product rate per hectare as listed on label. Sensitive plants, or foliage/fruit easily susceptible to staining, should be test sprayed prior to full scale application. Ensure suitable spray conditions (e.g. temperature, humidity, wind-speed), prior to foliar application. Compatibility and/or performance cannot be guaranteed when combined with other products. Jar test for compatibility and spray test on small area before wide-spread use. Refer to product label or PIS for alternate application rates.

Nutri-Tech Solutions P/L (NTS)

INSTRUCTIONS

- **FulvX** is fully soluble, but it should be added to the fertigation or mixing tank water, before the addition of liquid fertilisers.
- The **FulvX** powder should be added to the tank slowly and agitated vigorously. If you do not have agitation, then you can pre-mix smaller batches, in 20 litre buckets, before adding them to the tank.
- For sensitive spray equipment, the final liquid may need to be pre-filtered to prevent equipment blockages.
- The solution must be used promptly. i.e. Do not store.

Compatibility and/or performance cannot be guaranteed when combined with other product. Jar test for compatibility and spray on a small area before widespread application.

WARNING

Do not swallow. The dust from this product may act as an irritant. Avoid inhalation and contact with the eyes and skin.
